Abstract

OKSI is a token on a decentralized blockchain platform WAVES, which are focusing on custom blockchain tokens operations. National currencies transfer is maintained on the WAVES blockchain through compliant gateway operators. Decentralized token exchange facilitates fundraising, crowdfunding, and trading of financial instruments on the blockchain. Lightweight clients provide an easy installation procedure and a flat learning curve for end users.

Waves Smart Contract

OKSI Coins are designed through Waves Smart Contract which is a secured decentralized platform for applications that run exactly as programmed without any chance of fraud, censorship, or third-party interference.

Waves allows developers to program their own smart contracts. It supports a broader set of computational instructions.

Waves Smart contracts are able to:

- ◆ Manage agreements between users, say, if one buys insurance from the other.
- ◆ Function as 'multi-signature' accounts, so that funds are spent only when a required percentage of people agree.
- ◆ Provide utility to other contracts.
- ◆ Store information about an application, such as domain registration information or membership records.

Transactions

Each Transaction is being placed using a wallet (web wallet, Windows wallet or Mobile Wallet) as a block in the WAVES Blockchain in order to be verified or voted among the nodes in the network, that is the Stakers' work in the Proof of stake.

The Mission

Our primary mission is to launch an honest and transparent crypto-currency exchange with all the necessary functionality, complete anonymity and loyal technical support to our clients.

Our aim is to solve significant problems such as high commissions (input / output), lack of efficiency, unreliability, sluggish technical support, need for verification (confirmation of a person).

OKSI WAVES Token want to be recognized in the cryptocurrency world as one of the secured and safe altcoins that help people receive for their money quality goods and services from proven suppliers. OKSI over time wants to bring people all the benefits of online crypto payments over traditional payment methods.

We believe that we can provide proper service in the crypto trading currencies without the need for verification and with quality technical support.

Why is OKSI established and implemented?

OKSI COIN is being implemented to receive initial investment for the development and launch of a new and completely anonymous crypto-exchange market of the new generation, as well as for further maintenance of this project and guaranteeing its efficiency.

What is the idea of creating a new crypto-currency exchange?

Crypto-currency exchange is now so much, you say! Yes, really. Crypt exchangers are functioning quite a lot. However, far not all crypto exchangers allow you to buy and sell crypto currency without a preliminary verification (confirmation of a person), and even if they allow it, then verification will be necessary when withdrawing financial money. Also, on some crypto-currency exchanges it is very difficult or simply not really solves the issues and problems of customers in technical support.

Our team takes into account all the main problems and disadvantages of functioning of existing crypto-currency exchanges (high interest rates on input / output currencies, sluggish technical support, unstable service work), and in the near future, our crypto-currency exchange will operate without this kind of mistakes and problems, and our technical support will be as loyal as possible to each of our clients.

Issue and sale of OKSI (ICO)

Issue OKSI is 2.6 billion. The sale of OKSI, through ICO, will take place in 4 stages:

1) ICO Pre-Sale: 300M (+150M BONUS) - 1 OKSi Coin = \$0.02 {Each \$20 = 1,000 OKSI Coins + 50% Bonus = 1,500 OKSI Coins}

2) Round1-ICO: 400M (+160M BONUS) - 1 OKSI Coin = \$0.03 {Each \$30 = 1,000 OKSI Coins + 40% Bonus = 1,400 OKSI Coins}

3) Round2-ICO: 400M (+120M BONUS) - 1 OKSI Coin = \$0.04 {Each \$40 = 1,000 OKSI Coins + 30% Bonus = 1,300 OKSI Coins}

4) Round3-ICO: 400M (+80M BONUS) - 1 OKSI Coin = \$0.05 {Each \$50 = 1,000 OKSI Coins + 20% Bonus = 1,200 OKSI Coins}

The remaining 0.5 billion OKSI is allocated to support and develop the project.

Purchasing Methods

OKSI Coins can be purchased using WAVES, Ethereum ETH, BitCoin BTC, LiteCoin LTC, and other payment methods through OKSI Website.

Funds received and held in multi-signature wallets to accomplish each step in the Road Map.

The algorithm of action after the Pre-Sale

Upon completion of Pre Sale, the following algorithm will be implemented:

- ◆ The beginning of the development of the crypto-currency exchange:
 - Prepayment for crypto project developers;
 - Phased registration of a legal entity, opening of accounts in a bank, submission of documents for obtaining a trade license.
- ◆ Adding OKSI to already running crypto-currency exchanges.

Model of compensation for investments in OKSI and deductions in future profits

After the launch of the crypto-currency exchange (approximately summer 2019) - all major popular crypto currencies (Bitcoin, Ethereum, Dash, Waves, and others) will be added. OKSI will also be added. In due time, OKSI all that will be on personal account holders OKSI our crypto-currency exchange will be temporarily frozen and counted. There will be compensation for the value of OKSI in the ratio 1000 to 1. That is, for every 1000 OKSI will be charged \$1. These funds will be transferred to the BONUS account, and the sale of OKSI will be restored. The funds from the bonus account will be used to pay the commission on our crypt-currency exchange when conducting transactions for all available crypto currencies.

Compensation for investors OKSI will be held at least once a year! All information regarding the compensation of a part of the cost of the OKSI and the periods of conduct can be found on our official pages in social networks.

On our crypt-currency exchange will be implemented and available such features as - affiliate program and cash flow per turn. All functionalities will be available in your personal office.

On the newly created exchange will be promoted with the opportunity to receive additional funds.

OKSI Coins API

OKSI Coins API allows developers to add OKSI Coins as a local or global payment method. In future, many Businesses will be accepting OKSI Coins in their normal businesses to achieve further steps for higher values. You are able to buy or sell products or services using OKSI Coins that proves more reliability, success, higher value, and better future.

Other projects and OKSI

OKSI, as well as other crypto currencies, can be implemented in any projects. Our team plans to finance (but only after the launch and stable operation of our exchange crypto currencies):

- Separate crowd-projects and inventions;
- Development of applications for SMFs;
- Interesting portals and trading platforms on the stage of becoming for the purpose of partial ownership of the assets of these sites and obtaining further profits;
- Other.

OKSI Wallets

OKSI Users are eligible to send and receive their OKSI Coins through the WAVES Wallets on Mobiles, Tablets, PCs, and Laptops.

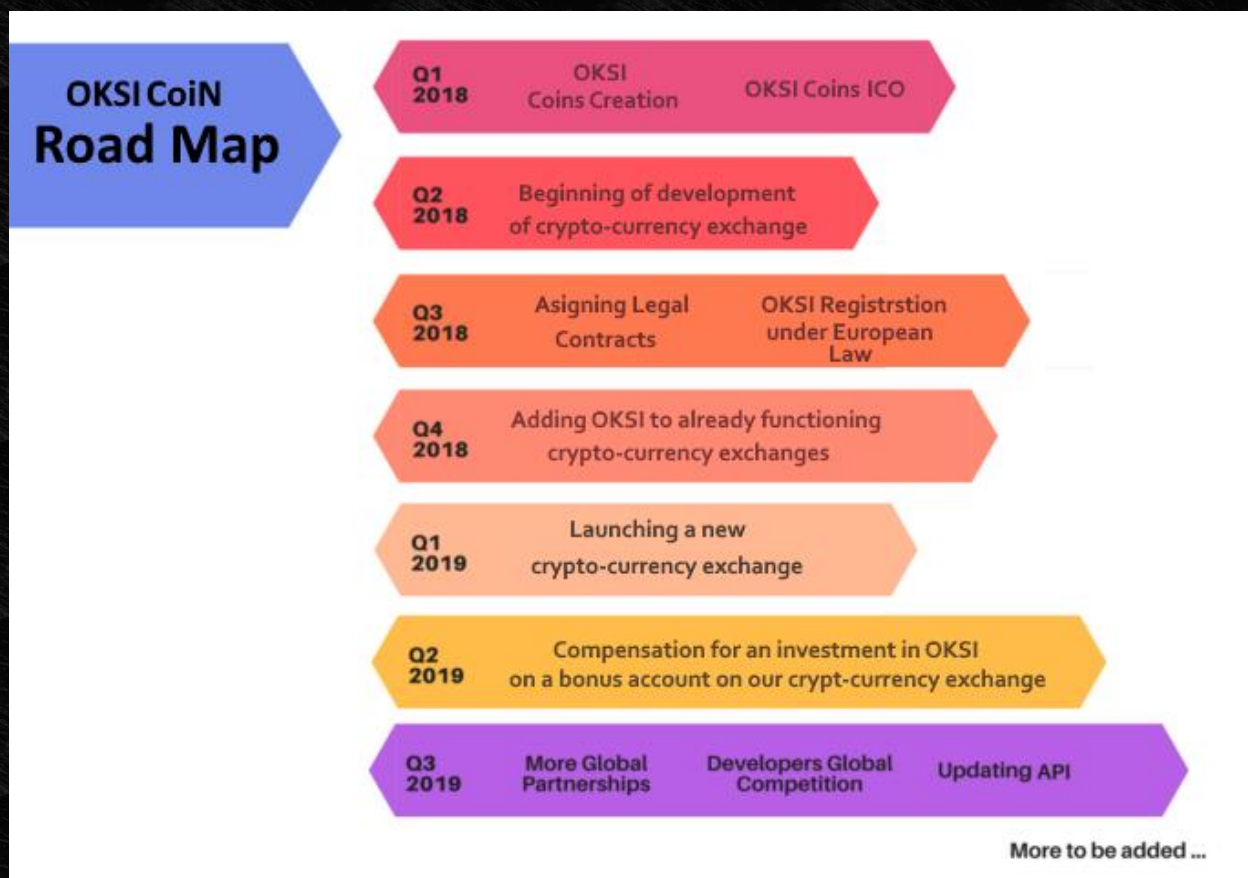

OKSI WAVES Wallets are available [here](#).

Future opportunities

Like any business project, OKSI aims to make a profit. Therefore, our team will try to develop services that combine all the necessary tools: loyal technical support, interesting bonus programs and other necessary functionality that will help our clients and our projects get the desired profit.

OKSI Road Map

OKSI is the new business logic for the public, decentralized applications, services and crowd-projects.

Welcome to OKSI
